## SERVICE MANUAL

Discard HCD-H61/H61M Service Manual (No. 9-957-612-11) previously issued. This Service Manual contains it.

- HCD-H61 is the tuner, deck, CD and amplifier section in FH-B610/B700.
- HCD-H61M is the tuner, deck, CD and amplifier section in MHC-610.

### SPECIFICATION

#### AUDIO POWER SPECIFICATIONS (For the Customers in the USA)

#### POWER OUTPUT AND TOTAL HARMONIC DISTORTION:

With 6 ohm loads, both channels driven, from 60 Hz—20 kHz; rated 35 watts per channel minimum RMS power, with no more than 1% total harmonic distortion from 250 milliwatts to rated output.

#### Tuner section

FM stereo. FM/AM superheterodyne tuner

#### FM tuner section

Tuning range For tourists model  
76.0—108.0 MHz

For East European model  
65.0—74.0 MHz

87.5—108.0 MHz

For other countries models  
87.5—108.0 MHz

Antenna FM lead antenna (for HCD-H61M)  
Telescopic antenna (for HCD-H61)

Antenna terminals  
75 ohm unbalanced

Intermediate frequency  
10.7 MHz

#### AM tuner section

Tuning range For US, Canadian model  
AM: 530—1,710 kHz

For Italian model  
AM: 522—1,611 kHz

For Germany model  
AM: 531—1,602 kHz

For AEP, East European, UK model  
MW: 531—1,602 kHz  
LW: 153—279 kHz

CD Section	Model Name Using Similar Mechanism		NEW
	CD Mechanism Type		CDM13B-5BD4E
	Base Unit Name		BU-5BD4E
Tape deck Section	Model Name Using Similar Mechanism		DXA-H2750
	Tape Transport Mechanism	DECK A	TCM-190RA12A
		DECK B	TCM-190RB22A

For other countries models

MW : 531—1,602 kHz (at 9 kHz step)  
530—1,710 kHz (at 10 kHz step,  
except for Middle Eastern model)

SW : 5.950—17.900 MHz

Antenna AM loop antenna  
External antenna terminals

Intermediate frequency  
450 kHz

#### Amplifier section

For AEP, UK, East European, Germany, Italian model

Continuous RMS power output

35+35 watts (6 ohms at 1 kHz, DIN)

40+40 watts (6 ohms at 1 kHz, 5% THD)

Music power output

80+80 watts (6 ohms at 1 kHz, 10% THD)

For US, Canadian model

35+35 watts (6 ohms at 1 kHz, 5% THD)

For other countries models

Continuous RMS power output

40+40 watts (6 ohms at 1 kHz, 5% THD)

Peak music power output

450 watts (4 speakers driven)

#### Inputs

For E, Saudi Arabia, Australian,  
Malaysia, Singapore, Tourist model

MIX MIC (minijack)

Sensitivity 1 mV,  
impedance 600 ohms

VIDEO/AUX (phono jack)

sensitivity 250 mV,  
impedance 47 kilohms

For AEP, UK, Germany, East European,  
Italian model

PHONO (phono jack)

sensitivity 5 mV,  
impedance 47 kilohms

For US, Canadian model

VIDEO/AUX (phono jack)

sensitivity 250 mV,  
impedance 47 kilohms

## SAFETY CHECK-OUT

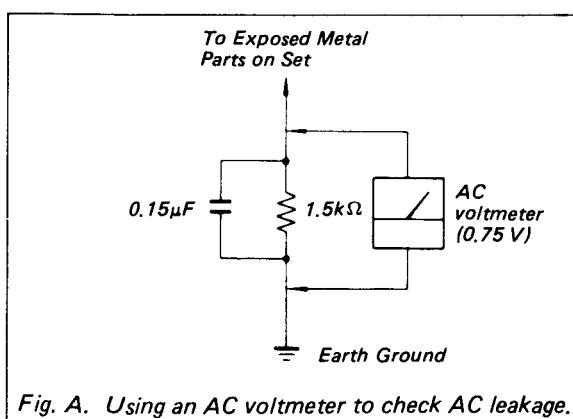

After correcting the original service problem, perform the following safety check before releasing the set to the customer:

Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

### LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

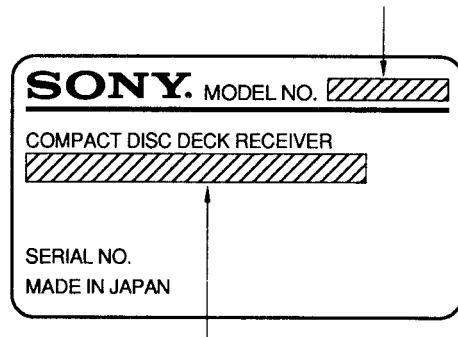

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75 V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2 V AC range are suitable. (See Fig. A)

### MODEL IDENTIFICATION

#### — Specification Labels —

AEP, Germany, Italian, E, East European,  
Saudi Arabia, Australian, Malaysia,  
Singapore, Tourist model : HCD-H61  
US, Canadian, AEP, UK model : HCD-H61M

US, Canadian model : AC: 120V 60Hz  
AEP, East European model : AC: 220-230V~50/60Hz  
UK, Australian model : AC: 240V~50Hz  
Germany, Italian model : AC: 220-230V~50Hz  
E, Saudi Arabia, Malaysia,  
Singapore, Tourist model : AC: 110-120/220-240V~50/60Hz

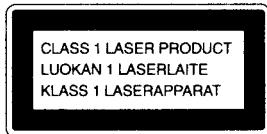

### SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY MARK OR DOTTED LINE WITH MARK ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

### ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!

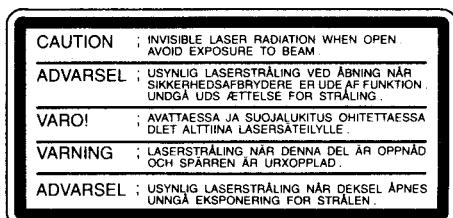

LES COMPOSANTS IDENTIFIÉS PAR UNE MARQUE SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

Laser component in this product is capable of emitting radiation exceeding the limit for Class 1.

This appliance is classified as a CLASS 1 LASER PRODUCT  
MARKING is located on the rear exterior.

The following caution label is located inside the unit.

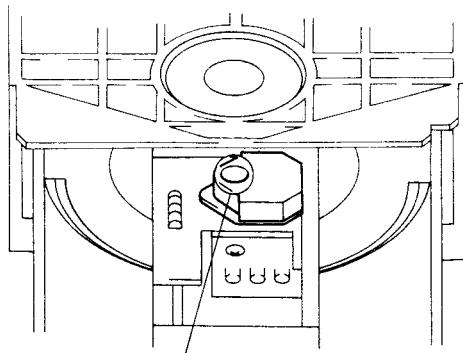

## SECTION 1

### SERVICING NOTES

#### LASER DIODE AND FOCUS SEARCH OPERATION

##### CHECK

1. Make POWER switch on with no disc inserted and disc table closed.
2. Confirm that the following operation is performed while observing the objecting lens.

- ① Confirm that laser beam is spread.
- ② Up and down motion of the objective lens. (3 times)

#### NOTES ON HANDLING THE OPTICAL PICK-UP BLOCK OR BASE UNIT

The laser diode in the optical pick-up block may suffer electrostatic break-down because of the potential difference generated by the charged electrostatic load, etc. on clothing and the human body.

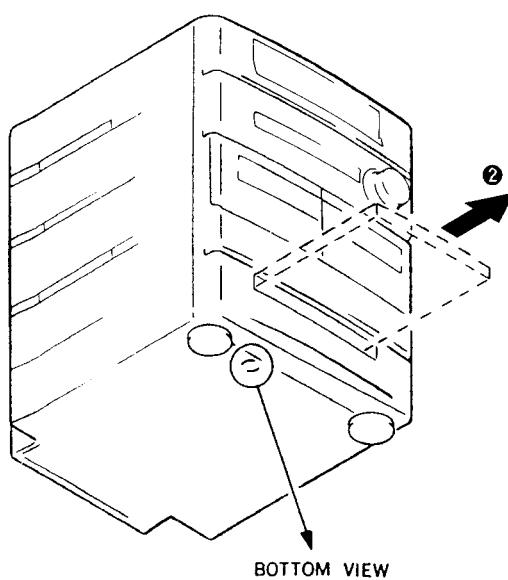

During repair, pay attention to electrostatic break-down and also use the procedure in the printed matter which is included in the repair parts.

The flexible board is easily damaged and should be handled with care.

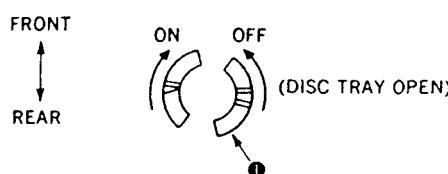

#### NOTES ON LASER DIODE EMISSION CHECK

The laser beam on this model is concentrated so as to be focused on the disc reflective surface by the objective lens in the optical pick-up block. Therefore, when checking the laser diode emission, observe from more than 30 cm away from the objective lens.

#### HOW TO OPEN THE DISC TRAY WHEN POWER SWITCH TURNS OFF

- (1) Insert to ① for tapering driver, etc., and turn in the direction of arrow OFF. (Disc tray open)
- (2) Tray as come out little of front panel, pull out in the direction of arrow ② by hand.

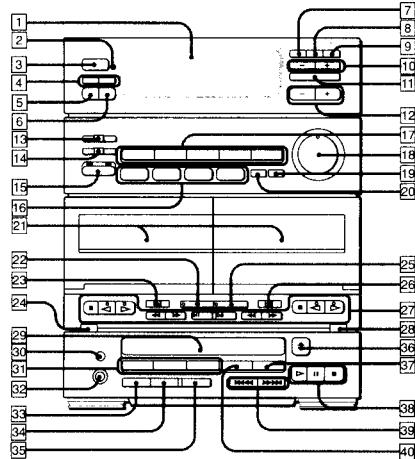

## SECTION 2 GENERAL

This section is extracted  
from instruction manual.

### Parts Identification

Refer to the pages indicated in parenthesis  
for use of the buttons.

### Clock Setting

#### Setting the Clock

The built-in clock shows the time in the display. Set the clock correctly to enjoy timer-activated features (see pages 21 – 22). The time is shown in 12-hour cycle.  
AM 12:00 = Midnight  
PM 12:00 = Noon

- 5 Press MEMORY/NEXT.  
The clock starts running.

To change to the clock display from other displays  
Press CLOCK DISPLAY.  
The clock is displayed for about 4 seconds, then the clock display changes into the normal display.

When a power interruption occurs  
The clock and timer settings are all erased, and "AM 12:00" will flash in the display.

Example: Set to 9:25 in the morning.

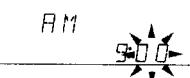

- 1 Press TIMER SET and CLOCK DISPLAY at the same time.  
The hour indication starts flashing.

- 2 Set the hour with PRESET/TIMER – or +.

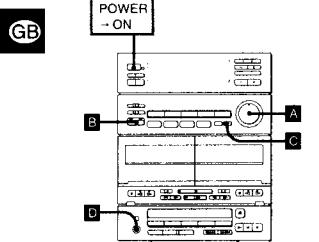

- 3 Press MEMORY/NEXT.  
The minute indication starts flashing.

- 4 Set the minute with PRESET/TIMER – or +.

## Audio Adjustment

### Volume Adjustment **A**

Turn VOLUME clockwise to increase the sound level, or counterclockwise to decrease it.  
(Or press VOL + or - on the remote commander.)

### Sound Quality Adjustment

**To reinforce bass **B****  
Press DBFB\* so that the indicator lights up. Each time you press the button, bass reinforcement level changes cyclically as follows:

### To activate surround effect for stereo sound **C**

Press S-SUR\*\* during a stereo sound reproduction so that the indicator lights up. This creates the atmosphere of a movie theater or concert hall. This function is not effective for a monaural sound.  
If you connect the surround speakers (not supplied) to the SURROUND SPEAKERS jacks so that you can obtain the best possible surround effect.

\*DBFB=Dynamic Bass Feedback  
\*\*S-SUR=Simulated surround

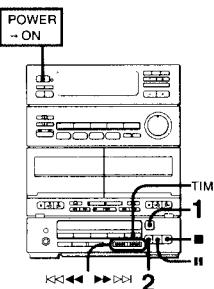

### Personal Listening **D**

Connect headphones to HEADPHONES. No sound comes from the speakers.

## CD Playing

### Playing the Entire Disc

Let's play from the first selection.

1 Press  $\triangle$  OPEN/CLOSE to open the tray.  
Place a disc with the printed side up.

2 Press  $\triangleright$ .  
The tray closes and play starts.  
Current selection number  
Elapsed playing number  
Current INDEX number  
Music calendar

To stop play  
Press  $\blacksquare$

To stop for a moment during play  
Press  $\triangleright$ .  
To resume play, press it again or  $\triangleright$

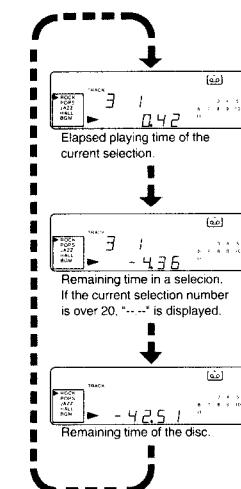

To stop play and open the tray  
Press  $\triangle$  OPEN/CLOSE.

**Caution on adjusting volume**  
Do not turn up the volume while listening to a portion with very low level inputs or no audio signals. If you do, the speakers may be damaged when a peak level portion is played.

**To play an 8 cm (3-inch) CD**  
Place it on the inner circle of the tray. If the disc is provided with an adaptor, first remove it. Do not put a normal CD (12 cm/5-inch) on top of an 8 cm CD

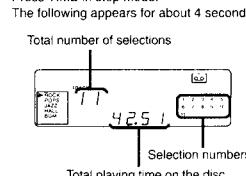

### Information display

**To change the time display**  
Press TIME during play.  
The display changes to give you the following information

**Note**  
You can also see the information above by pressing TIME during Shuffle, Delete and Program Play; however, the remaining time is shown as "..." when the disc has more than 20 selections.

**To display the total playing time of the disc**  
Press TIME in stop mode.  
The following appears for about 4 seconds

This information appears also when you close the tray by pressing  $\triangle$  OPEN/CLOSE.

### Locating a Particular Selection — Automatic Music Sensor (AMS)

The AMS locates the beginning of a selection.

**To locate the beginning of the current or preceding selection**  
Press  $\triangleleft\triangleleft$  (or  $\triangleleft$  on the remote commander) as many times as required.

**To locate the beginning of the succeeding selection**  
Press  $\triangleright\triangleright$  (or  $\triangleright$  on the remote commander) as many times as required.

### Locating a Particular Point in a Selection

You can locate any particular point in the selection. This function works during either play or pause. This operation is not possible with the remote commander.

**To search while monitoring the sound**

**To move forward at high speed**  
keep  $\triangleright\triangleright$  depressed and release it at the desired point.

**To move backward at the high speed**  
keep  $\triangleleft\triangleleft$  depressed and release it at the desired point.

### To search quickly

1 Press  $\blacksquare$  to set the unit in pause mode.

2 Keep  $\triangleleft\triangleleft$  or  $\triangleright\triangleright$  depressed.

The search speed increases, but there is no sound. Find the desired point by observing the display and release the button.

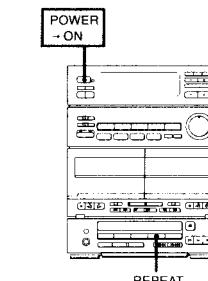

3 Press  $\blacksquare$  again or  $\triangleright$  at the desired point to play.

### One Touch Play

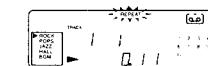

Press CD when the power is turned off.  
If a disc has been inserted, you can listen to the disc without pressing any other buttons. If not, you can turn on the system but cannot start play.

### Playing Repeatedly — Repeat Play

You can choose between two different repeat play modes. One repeats all the selections in the current mode; the other repeats any given selection.  
This operation is not possible with the remote commander.

**To repeat all the selections**  
Press REPEAT once during play so that "REPEAT" appears in the display.

**To repeat a single selection**  
Press REPEAT twice while playing the desired selection so that "REPEAT 1" appears in the display.  
(Operable only in normal play and delete play mode)

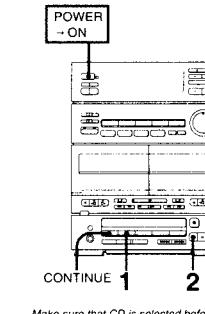

**To stop playing**  
Press  $\blacksquare$ .

**To cancel repeat play**  
Press REPEAT so that neither "REPEAT" nor "REPEAT 1" appears.

**Note**  
Repeat play function works also during:  
• shuffle play  
• delete play  
• delete shuffle play  
• program play.  
Multi-disc program play (see page 11) cannot be repeated

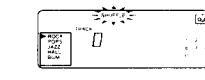

### Playing in a Random Order — Shuffle Play

Shuffle play function plays all selections in a random order.  
This operation is not possible with the remote commander.

**Make sure that CD is selected before going to the following steps.**

1 Press SHUFFLE.  
"SHUFFLE" appears in the display.

2 Press  $\triangleright$ .  
"1" appears and then shuffle play starts.

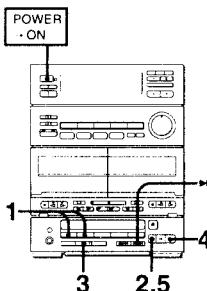

**To cancel shuffle play**  
Press CONTINUE.  
"SHUFFLE" disappears, and play continues in normal play mode.

## CD Playing (Continued)

### Playing Only the Desired Selections — Delete Play

You can delete unwanted selections and play the remaining selections either in normal or shuffle play mode. This operation is not possible with the remote commander.

Make sure that CD is selected before going to the following steps

**1 Press SHUFFLE or CONTINUE.**  
"SHUFFLE" appears in the display only if you have pressed SHUFFLE; that is, the unit is now engaged in shuffle play mode.

**2 Press >>.**  
Shuffle or normal play starts

**3 Press CLEAR while unwanted selections are being played.**  
The number of the selection and "OFF" appears in the display when the selection is deleted.

### To skip selections

Press >>>> (or >>> on the remote commander). These selections are just skipped but not deleted.

### 4 Press ■ after deleting all the unwanted selections.

All the selection numbers which you have not deleted appear in the display.

### 5 Press >>.

- If "SHUFFLE" is displayed, the remaining selections are played in shuffle play mode. (Delete shuffle play)
- If "SHUFFLE" is not displayed, the remaining selections are played in normal play mode. (Delete play)

**To restore all the selections you have deleted**  
Press ■ in stop mode.

### Playing in a Desired Order — Program Play

You can make a program by designating up to 24 selections in the order you want them to be played, while checking the total playing time.

This operation is not possible with the remote commander.

Make sure that CD is selected before going to the following steps

### 1 Press PROGRAM.

"PROGRAM" appears in the display.

### 2 Press <<<< or >>>> to choose a selection.

The total playing time is displayed. If it is satisfactory, go to the next step. If not, choose another selection instead.

### 3 Press PROGRAM while the selection number is flashing.

The selection is chosen and the selection number turns to light.

### 4 Repeat steps 2 and 3 to program other selections.

### 5 Press >>.

All the programmed selections are played in the programmed order.

### To program a pause

Press ■.  
"P" appears and the total playing time is reset to 0.00

### To stop play

Press ■.  
To restart the same program play, press >>.

### To cancel the program play

Press CONTINUE.  
The program is erased and the play continues in normal play mode.

### To check the program

Press CHECK.  
Each time you press CHECK, the number of the selection and the order to be played appear in the display. After the last selection is displayed, "END" appears in the display.

Make sure that CD is selected before going to the following steps

### To erase a selection

**1 Press CHECK so that the number of the selection you wish to erase appears in the music calendar. You cannot erase the selection being played.**

### 2 Press CLEAR

**To erase the entire program**  
Press ■ once in stop mode: twice during play. The program is also erased when you turn off the system.

**If "—, —" is displayed instead of the total playing time during programming or during play**

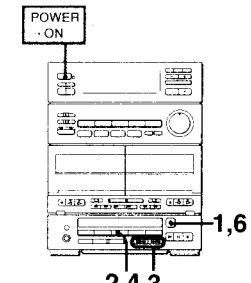

- You have programmed a selection the number of which is over 20.
- The total time has exceeded 100 minutes.

**To check the remaining time during play**  
Press TIME once to see the remaining time of the selection being played; twice to see the total remaining time of the whole program; once more to return to the initial display. If you have inserted a pause, the display shows the remaining time until the pause.

### Designating the Playing Order of Up to 6 Discs — Multi-disc Program

You can make a program by designating up to 24 selections from a maximum of 6 discs in the order you want them to be played. At the same time, you can adjust the total playing time of the program. This function is convenient for editing tapes from different discs.

This operation is not possible with the remote commander.

Make sure that CD is selected before going to the following steps

### 1 Press >> OPEN/CLOSE and insert the first disc.

**To play the program**  
Insert the first disc and press >>.

When "DISC 2" appears in the display, replace the first disc with the second disc and press >>.

Continue replacing the discs until the last disc. When playing of the last disc is over, "DISC END" appears in the display. The unit returns to the initial standby condition of program play from the first disc.

### 2 Press PROGRAM.

"PROGRAM" appears in the display.

### 3 Press <<<< or >>>> to choose a selection.

The total playing time is displayed. If it is satisfactory, go to the next step. If not, choose another selection instead.

### 4 Press PROGRAM while the selection number is flashing.

The selection is chosen and the selection number turns to light.

### 5 Repeat steps 3 and 4 to program other selections from the first disc.

### 6 Press >> OPEN/CLOSE and remove the first disc and insert the second disc.

"PROGRAM (MULTI)" and "DISC 2"

appear in the display.

### 7 Repeat steps 3 through 6 to program other selections from other discs.

Up to 24 selections from a maximum of 6 discs can be programmed.

The total playing time for all selections appears in the display.

### To stop playing

Press ■.

### To check the number of the disc inserted

Press TIME in stop mode.  
The number of the disc appears.

### To cancel the program play

Press CONTINUE.

### To check the program

Press CHECK.  
Each time you press CHECK, the number of the disc and the selection appear. After the last selection is displayed, "END" appears in the display.

### To erase a selection from the end of the program

- 1 Insert the last disc.
- 2 Press CLEAR.

Each time you press CLEAR, the last selection is erased from the end of the program.

If you insert a pause in your program, you cannot erase the selections programmed before the pause.

### To erase the entire program

Press ■ once in stop mode: twice during play.

### Notes on multi-disc program

- You cannot use the repeat play function.
- Do not insert a pause in your program when you want to use the CD SYNCHRO button.

**If "—, —" is displayed instead of the total playing time during programming or during play**

- You have programmed a selection the number of which is over 20.
- The total time has exceeded 100 minutes.

### Notes on handling discs

- To keep the disc clean, handle the disc by its edge. Do not touch the surface.
- Do not stick paper or tape onto the disc.

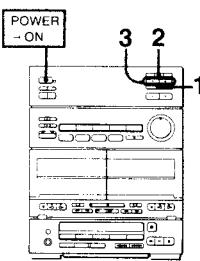

- Do not expose the disc to direct sunlight or heat sources such as a hot air duct, nor leave it in a car parked in direct sunlight as there can be a considerable rise in the temperature.
- After playing, store the disc in its case.

## Radio

The automatic tuning enables you to find a station when its signal is strong enough. When the signal is too weak, use the manual tuning.

### Automatic Tuning

1 Press BAND repeatedly until the desired band appears.  
As you press BAND, the band changes as follows:

\*1 → FM → AM

\*2 → FM → MW → LW

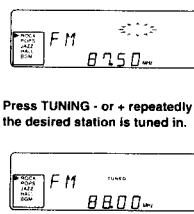

\*3 → FM → MW → SW

2 Press AUTO so that "AUTO" appears in the display.

3 Press TUNING - or + repeatedly until the desired station is tuned in.

### When an FM program is noisy or hard to receive

Press MODE so that "MONO" appears in the display. There will be no stereo effect, but the reception will be improved. Press the button again to restore the stereo effect.

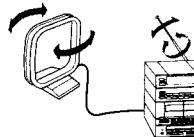

#### Note

\* 1: Only for US, Canadian, Italian and Germany models.

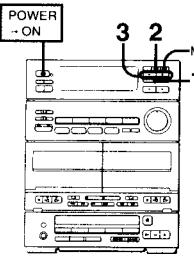

\* 2: Only for AEP, East European and UK models.

\* 3: Only for E, Saudi Arabia, Australian, Malaysia, Singapore and Tourist models.

**Antenna adjustment**  
For FM reception, adjust the length and direction of the telescopic antenna (HCD-H61).  
For AM (MW, LW and SW) reception, find the best location for the supplied AM loop antenna.

### Manual Tuning

### Changing the MW Tuning Interval (Except for Middle Eastern, UK and East European models)

The MW tuning interval is preset at the factory to 9 kHz for E, Tourist and Australian models, and 10 kHz for US and Canadian models. If you use the system where the frequency allocation system is different from the preset interval, change the interval as follows:

- 1 Turn on the power.
- 2 Tune in any MW station.
- 3 Turn off the power.
- 4 Turn the power back on while pressing TUNING +.

To reset the interval, follow the same procedure.

#### Important

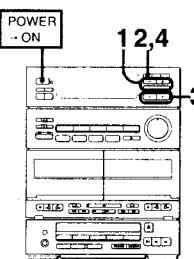

When the interval is changed, stored stations will be erased from the memory.

### One Touch Play

Press TUNER when the power is turned off. You can listen to the last received station without pressing any other buttons.

### Storing Stations

You can store up to 20 FM stations and 10 MW stations and 10 SW stations in a desired sequence, so that you can tune in the stored station directly by entering the preset station number. This operation is not possible with the remote commander.

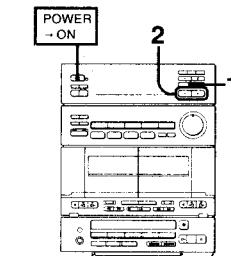

5 Repeat step 1 to 4 for each station to be stored.

**If you cannot store a station successfully**  
Press MEMORY/NEXT again so that "MEMORY" appears, and then proceed with steps 3 and 4 above. Be sure to operate while "MEMORY" is on. (about four seconds.)

**When you have selected the wrong preset station number**  
Press MEMORY/NEXT again and then proceed with steps 3 and 4.

**To change the preset station**  
Store a desired station at the desired preset number by proceeding with the above steps. The station previously preset will be erased. Erasing only is not possible.

### Tuning in a Preset Station

1 Press BAND and TUNING - or + to tune in the desired station.

2 Press MEMORY/NEXT.  
MEMORY and the preset station numbers appear in the display.

3 While "MEMORY" is on (for about 4 seconds), press PRESET/TIMER - or + to select a desired preset number.

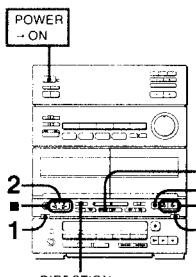

4 Press MEMORY/NEXT.  
"MEMORY" disappears, and the station is stored in the preset number.

## Tape Playback

GB

### Playback Operation

1 Press  $\Delta$  and insert a tape in deck A or B.

2 Press  $\triangleright$  (for front side playback) or  $\triangleleft$  (for reverse side playback). Playback starts.

#### To stop playback

Press  $\blacksquare$ .

**To stop for a moment during play (Deck B only)**  
Press  $\text{II PAUSE}$ .  
To resume play, press it again.

#### How to select the DIRECTION mode position

To playback one side, set it to  $\triangleleft$ . To play back both sides, set it to  $\triangleright\triangleleft$ . (The deck stops automatically after repeating the sequence 5 times.) To playback both decks in succession, set it to RELAY. See "Playing Both Decks in Succession — Relay Play" on page 14. The DIRECTION mode setting is effective for both decks.

**If you play both decks at the same time**  
You hear the sound from deck A.

(to be continued)

## Tape Playback (continued)

(continued)

**When listening to the tape recorded with the Dolby noise reduction system\***  
Set the DOLBY NR selector to ON. The setting is active for both decks. This system is provided with the Dolby B NR system.

**What is the Dolby NR system?**  
Dolby NR (noise reduction) system reduces tape hiss noise in low-level high-frequency signals. The system boosts these signals during recording and lowers them during playback.

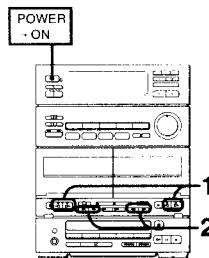

\* Dolby noise reduction manufactured under license from Dolby Laboratories Licensing Corporation.  
"DOLBY" and double-D symbol  are trademarks of Dolby Laboratories Licensing Corporation.

### One Touch Play

Press TAPE when the power is turned off. If a tape has been inserted, you can listen to the tape without pressing any other buttons. If not, you can turn on the system but cannot start playback.

### Locating the Beginning of a Selection during Playback — Automatic Music Sensor (AMS)

The AMS locates the beginning of a selection by detecting the blank spaces between selections. To assure correct operation of the AMS, there must be a three-second blank or more between selections. By using the CD synchronized recording (Fade Edit, Time Edit, Just Edit, and Program Edit), you can make three-second blanks among recorded selections.

- 1 Press  $\triangleright$  or  $\triangleleft$  to start playback.
- 2 Press  $\gg$  or  $\triangleleft\triangleleft$  referring to the following table.

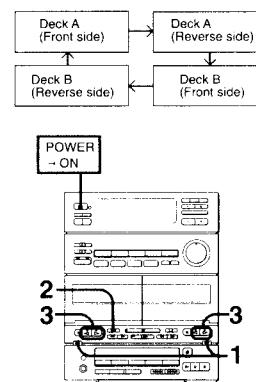

Side of the cassette being played	Desired selection	
	Next selection	Selection being played
Front side ( $\triangleright$ )	$\gg$	$\triangleleft$
Reverse side ( $\triangleleft$ )	$\triangleleft\triangleleft$	$\gg$

**Notes:**

- AMS does not function on both decks at the same time.
- AMS does not function while the other deck is being played.

### Playing Both Decks in Succession — Relay Play

Relay play always follows the sequence below regardless of where playback starts. When playback of the reverse side of the tape in deck B is over, the following sequence continues 4 more times.

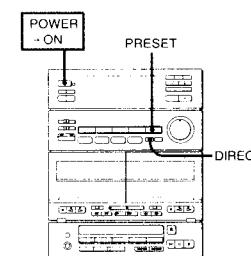

- 1 Press  $\triangleleft$  and insert recorded tapes in both decks.
- 2 Set the DIRECTION mode selector to RELAY.
- 3 Press  $\triangleright$  or  $\triangleleft$  on either deck.

**To stop relay play**  
Press  $\blacksquare$  on the playing deck.

## Using the Graphic Equalizer

### Making Use of the Preset Equalizer Settings

When the system is shipped from the factory, five specially recommended settings of the graphic equalizer are stored. You can enjoy the effect of the equalizer by simply choosing from these five preset settings according to the program source.

**Press PRESET to select the preset equalizer setting, referring to the table as shown below.**

Display	Applications
1 ROCK	For rock
2 POPS	Vocal sound is intensified
3 JAZZ	For jazz
4 HALL	For orchestral music
5 BGM	For background music

When you select a setting, the display shows the equalizer curve as shown below.

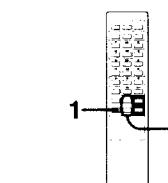

**When you do not want to apply the equalizer effect**

Press DIRECT so that "DIRECT" appears in the display and the indicator lights up.

### Adjusting the Bass and Treble Sound

This function allows you to adjust the sound by raising and lowering the level of bass and/or treble sound. This operation is possible only with the remote commander.

**Note:**  
You cannot store the sound adjusted with BASS and TREBLE

**1 Press BASS/TREBLE so that "BASS" or "TRE" appears with the decibel indication in the display.**

Each time you press the button, the display switches to show cyclically "BASS" or "TRE". Select "BASS" to adjust lower frequency ranges and "TRE" to adjust higher frequency ranges.

**2 Press BASS/TREBLE + or - to adjust the level.**

BASS/TREBLE +: Increase the decibel indication to enhance the level.

BASS/TREBLE -: Decrease the decibel indication to reduce the level.

**To confirm the effect of the adjustment** (This is not possible if you adjust the bass/treble effect while the DIRECT indicator is on)

Press DIRECT.

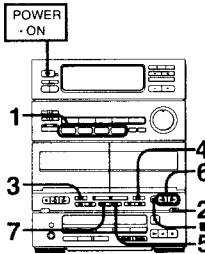

You can compare the difference between the adjusted sound (the DIRECT indicator is off) and no equalizer and bass/ treble effect sound (the DIRECT indicator is on).

## Recording

GB

### Recording Operation (Deck B)

Use TYPE I (normal) or TYPE II (CrO<sub>2</sub>) tapes for recording.

1 Select a program source you want to record with the function selecting buttons.

2 Press  $\Delta$  and insert a blank tape into deck B.

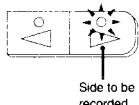

3 Set the DIRECTION mode selector. To record one side, set it to  $\overleftarrow{\square}$ . To record both sides, set it to  $\square\triangle$ .

4 Set to DOLBY NR switch to ON or OFF.

5 Press  $\bullet$  REC. Deck B enters the recording pause mode.

6 If the desired direction indicator is not lighted, select the side to be recorded. Press  $\triangleright$  (for front side recording) or  $\triangleleft$  (for reverse side recording).

7 Press  $\bullet$  II PAUSE. Recording pause mode is released and recording starts.

8 Play the source selected in step 1.

## Tape Dubbing

### To stop recording

Press  $\bullet$ .

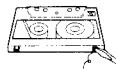

**Notes:**

- Even if you set the DIRECTION mode selector to  $\square\triangle$ , recording stops at the end of the reverse side. To record on both sides, be sure to start with the front side.
- The recording level is fixed and cannot be adjusted manually.
- Equalizer effect cannot be recorded.

### Notes on Cassettes

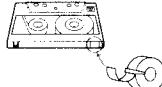

#### To protect the recording

Break off the tab on the left shoulder on the cassette side of which recording is to be protected.

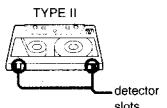

#### To re-record the cassette

Cover each opening with plastic tape.

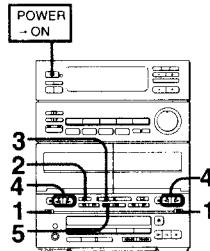

When using a type II (CrO<sub>2</sub>) cassette, be careful not to cover the detector slots which are necessary for automatic tape type detection.

### Dubbing the Whole Tape at High Speed

This operation is not possible with the remote commander.

1 Press  $\Delta$ , and insert a recorded tape in deck A and a blank tape in deck B.

2 Set the DIRECTION mode selector. To dub on one side: set it to  $\overleftarrow{\square}$ . To dub on both sides: set it to  $\square\triangle$  or RELAY. (See "DIRECTION mode setting" on the next page.)

3 Press HIGH SPEED DUBBING. Deck B enters recording pause mode.

4 Choose the same direction on both decks by pressing  $\triangleright$  or  $\triangleleft$ . To dub on one side, choose  $\triangleright$  or  $\triangleleft$ . To dub on both sides, choose  $\triangleright$ .

5 Press  $\bullet$  II PAUSE. Dubbing starts.

6 To stop dubbing Press  $\bullet$  on deck B.

### DIRECTION mode setting

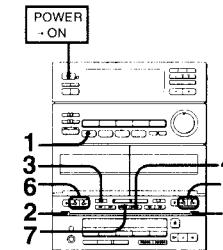

Position	Operation
$\overleftarrow{\square}$	Dubbing stops at the end of the tape.
$\square\triangle$	When the tape in one deck comes to its end of the front side, it reverses immediately regardless of the tape position in the other deck.
RELAY	When the tape in one deck reaches its end of the front side, it stops until the other tape come to its end, and then both tape reverse together.

**When dubbing starts from the reverse side in RELAY mode**  
At the end of the reverse side, dubbing stops automatically.

**Is it necessary to set DOLBY NR?**  
No. The tape in deck B is automatically recorded in the same state as the tape in deck A.

**If the indicator on the HIGH SPEED DUBBING button flashes 3 times and disappears**  
The tab(s) of the cassette inserted into deck B has (have) been removed. Dubbing is not possible on that cassette. Cover the opening with plastic tape.

### Manual Dubbing

1 Press TAPE (or FUNCTION repeatedly on the remote commander). "TAPE" appears in the display.

2 Press  $\Delta$  and insert a recorded tape in deck A and a blank tape in deck B.

3 Set the DIRECTION mode selector. To dub on only one side, set it to  $\overleftarrow{\square}$ . To dub on both sides: set it to  $\square\triangle$ .

4 Press  $\bullet$  REC. Deck B enters recording pause mode.

5 If the desired direction indicator is not lighted, select the side to be recorded on the deck B. Press  $\triangleright$  (for front side recording) or  $\triangleleft$  (for reverse side recording).

6 Press  $\triangleright$  or  $\triangleleft$  on deck A. Playback starts.

7 Press  $\bullet$  II PAUSE. Normal speed dubbing starts.

**To stop dubbing**  
Press  $\bullet$  on both decks.

**Is it necessary to set DOLBY NR?**  
No. The tape in deck B is automatically recording in the same state as the tape in deck A.

**Is it possible to listen to program sources other than tape during dubbing?**  
During high speed dubbing, yes. Any program source can be selected.  
During manual dubbing, no. The source changes to the selected function and the tape playback cannot be dubbed.

GB

## CD Recording

### Fading Out at the Designated Time — Time Fade

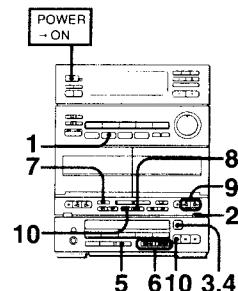

You can have the disc play fade out at the end by designating the playing time so that the selection at the end of the tape fades out naturally without breaking abruptly in the middle.

#### How Time Fade functions

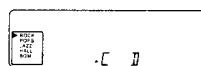

Deck B records the selections in the order they appear on the disc. Five seconds before the designated time, the recording level falls gradually. At the designated time, the recording ends and the CD player enters pause mode. This function works for both sides of the tape by designating the time once. This function works also during repeat, shuffle, and program play.

#### Time Fade operation

This operation is not possible with the remote commander

- 1 Press CD. "CD" appears in the display.

- 2 Press  $\Delta$  and insert a blank tape into deck B.

- 3 Press  $\Delta$  OPEN/CLOSE and place a disc.

- 4 Press  $\Delta$  OPEN/CLOSE again to close the tray.

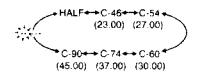

**Note:**  
Make sure that the total number of selections and the total playing time appear in the display.

- 5 Press EDIT three times. "TIME FADE" appears in the display.

- 6 Press  $\ll\ll$  or  $\gg\gg$  to designate the tape length.

You can use a 46-, 54-, 60-, 74-, or 90-minute cassette tape. As you press these buttons, the minute display changes as follows:

#### When you choose "HALF"

The CD player fades out after playing just the half of the total playing time of the disc.

- 7 Set the DIRECTION mode selector.

To record on one side, set it to  $\square$ . To record on both sides, set it to  $\square\square$ .

- 8 Press  $\bullet$  REC.

Deck B enters recording pause mode.

- 9 If the desired direction indicator on play button is not lighted, select the side to be recorded on deck B.

Press  $\triangleright$  (for front side recording) or  $\triangleleft$  (for reverse side recording).

- 10 Press  $\bullet$  PAUSE on deck B and  $\bullet$  on the CD player.

Recording pause mode is released, CD playing starts, and recording starts.

#### When playback ends

The CD player fades out and enters pause mode at the designated time. "TIME FADE B" appears in the display. Deck B reverses automatically if you set the DIRECTION mode selector to  $\square\square$ .

#### To cancel Time Fade

During stop, press EDIT so that "TIME FADE" disappears.

#### When the playback of the disc ends during Time Fade

Time Fade is still active. If you place another disc, the recording can be continued and will fade out when the total playing time of the discs reaches the designated time.

#### To check the remaining time during Time Fade

When you press EDIT twice, the remaining time until the designated time is displayed.

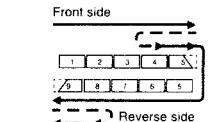

If you press  $\ll\ll$  or  $\gg\gg$ : Time Fade will be canceled.

#### Recording the Entire Program on a Disc — Fade Edit

CD program playback and tape recording start simultaneously due to the Synchronized Start function. The selection at the end of the tape does not break abruptly in the middle, but fades out automatically (Fade Edit). By recording with Fade Edit, you can make three-second blanks among the selections on the recorded tape.

#### How Fade Edit functions

Deck B records the selections in the order on the disc. If the tape ends in the middle of the selection, deck B rewinds the tape to the beginning of that selection. Then the selection is recorded so that it fades out naturally at the end of the tape. If the recording is to be continued to the reverse side, the selection that has faded out on the front side is recorded again from the beginning on the reverse side.

- 1 Press CD. "CD" appears in the display.

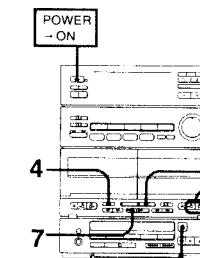

**Note:**  
Make sure that the total number of selections and the total playing time appear in the display.

- 2 Press  $\Delta$  and insert a blank tape into deck B.

- 3 Press  $\Delta$  OPEN/CLOSE and place a disc.

#### Fade Edit operation

This operation is not possible with the remote commander

- 1 Press  $\Delta$  and insert a blank tape into deck B.

- 2 Press  $\Delta$  OPEN/CLOSE and place a disc.

- 3 Press  $\Delta$  OPEN/CLOSE again to close the tray.

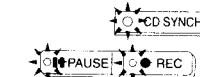

**Note:**  
Make sure that the total number of selections and the total playing time appear in the display.

- 4 Set the DIRECTION mode selector.

To record on one side, set it to  $\square$ . To record on both sides, set it to  $\square\square$ .

- 5 Press CD SYNCHRO.

Deck B enters recording pause mode.

- 6 If the desired direction indicator on play button is not lighted, select the side to be recorded by pressing  $\triangleright$  or  $\triangleleft$ .

To record on the front side or on both sides, press  $\triangleright$ .

To record only on the reverse side, press  $\triangleleft$ .

- 7 Press  $\bullet$  PAUSE.

The recording starts. After about 10 seconds, the CD playback starts.

#### To stop recording

Press  $\bullet$  on deck B or  $\bullet$  on the CD player.

**Note:**  
When the tab on the cassette has been removed, the CD SYNCHRO button does not operate.

**Is it possible to listen to program sources other than CD during CD recording?**

No. If you select another function, the CD play stops and the selected function will be recorded.

#### Editing the CD for Recording

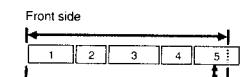

The CD player automatically edits the selections on a disc according to the tape length. There are two ways of editing: Time Edit and Just Edit.

By recording with Time Edit and Just Edit, you can make three-second blanks among the selections on the recorded tape.

#### How Time Edit functions

The CD player selects the selections so that the total recording time of the selections is within the designated tape length and so that the order of the selections changes as little as possible. This function is convenient when you know the available recording length of the tape.

The CD player selects the selections from the first one in the disc, summing up each playing time. When the total playing time exceeds the designated tape length, the last selection is eliminated and replaced with another selection which is not longer than the remaining time. The eliminated selection is recorded on the reverse side. If you do not want to miss recording some specific selections, you can select them beforehand.

- 1 If the desired direction indicator on play button is not lighted, select the side to be recorded by pressing  $\triangleright$  or  $\triangleleft$ .

To record on the front side or on both sides, press  $\triangleright$ .

To record only on the reverse side, press  $\triangleleft$ .

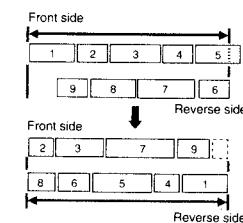

- 2 Press  $\bullet$  PAUSE.

The recording starts. After about 10 seconds, the CD playback starts.

#### How Just Edit functions

The CD player chooses the selections so that the total recording time of the selections is within the designated tape length and so that you can record as many selections as possible by changing the order of the selections. This function is convenient when you want to record as many selections as possible.

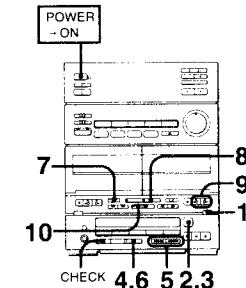

The CD player selects the selections so that the total playing time best fits length of side A. Then the player selects from the remaining selections to record on side B. If you do not want to miss recording specific selections, you can select them beforehand.

**Note:**  
You can edit only the selections from selection numbers 1 to 20 in the disc using Time Edit and Just Edit.

## CD Recording (continued)

**Time Edit and Just Edit operations**  
This operation is not possible with the remote commander.

1 Press  $\Delta$  and insert a blank tape into deck B.

2 Press  $\Delta$  OPEN/CLOSE and place a disc.

3 Press  $\Delta$  OPEN/CLOSE to close the tray.

**Note:**  
Make sure that the total number of selections and the total playing time appear in the display.

4 Press EDIT and display "EDIT" (Time Edit) or "JUST EDIT".

To choose Time Edit, press EDIT once.  
To choose Just Edit, press EDIT twice.

5 Press  $\Delta$  or  $\nabla$  to designate the tape length.

You can use a 46-, 54-, 60-, 74-, or 90-minute cassette tape. As you press these buttons, the minute display changes as follows:

When you choose "HALF" during Time Edit

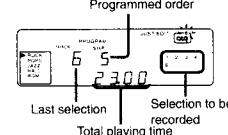

The CD player divides the selections in the disc between side A and side B without changing their order and plays them so that no selection is left out of the recording.

When you choose "HALF" during Just Edit

The CD player programs the selections by changing their order so that the recording time on one side of the tape is half the total playing time. However, the program of side A may be a little longer than that of side B because the CD player distributes all the selections of the entire disc.

6 Press EDIT.

The selections to be recorded on one side are determined automatically. Then the display shows:

For recording on both sides

Press EDIT again.  
The selections to be recorded on the other side are determined.

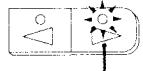

To add selections (Link function)

If there is remaining time even after programming all the selections on the disc, "LINK" and the selection numbers that can be recorded within the remaining time flash in the display. You can add these selections to the program. When you want to record the selections of another disc, replace the disc. The selection numbers that can be recorded flash in the same way:

- Press EDIT.  
All the selections that can be recorded are programmed.

9 If the desired direction indicator on play button is not lighted, select the side to be recorded by pressing  $\triangleright$  or  $\triangleleft$  on deck B.

To record on the front side or on both sides, press  $\triangleright$ .  
To record only on the reverse side, press  $\triangleleft$ .

10 Press  $\triangleright$  PAUSE.

The recording starts. After about 10 seconds, the CD playback starts.

To stop recording

Press  $\blacksquare$  on deck B or  $\blacksquare$  on the CD player.

To select the desired selections beforehand

You can place priority on some selections to be recorded by selecting them first using the program function of the CD player (see page 10) before performing Time Edit or Just Edit.

To check the program

Press CHECK.

In the display window, "A" appears while checking the program for side A, and "B" appears while checking the program for side B.

**Notes:**

- Time Edit and Just Edit do not function when you program more than 20 selections on one disc.
- Do not press any other buttons than those mentioned in the procedure during Time Edit or Just Edit.
- When the tab on the cassette has been removed, the CD SYNCHRO button does not operate.

If it takes time for programming during Just Edit

For some discs with many selections, it may take a while for programming. In this case, press  $\blacksquare$ . Programming procedure is stopped, but you can get the program though the program length is not the same as you have designated.

To use the CD synchronized recording function with more than one disc

Use the multi-disc program function (page 11).

Press CD SYNCHRO and  $\triangleright$  PAUSE each time you change the disc.

7 Set the DIRECTION mode selector.

To record on one side, set it to  $\triangleleft$ .  
To record on both sides, set it to  $\triangleright$ .

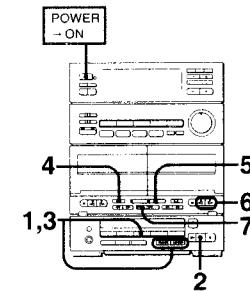

8 Press CD SYNCHRO.

Deck B enters recording pause mode.

### Programming the Selections while Checking the Total Playing time — Program Edit

You can adjust the total playing time to the tape length while making a program. By recording with Program Edit, you can make three-second blanks among the selections on the recorded tape.

1 Program desired selections for side A.  
(See page 10, "Playing in a Desired Order — Program Play.")

**Notes:**  
Make sure that "A" is lit in the display.

2 Press  $\triangleright$  on the CD player

"P" appears in the display and the total playing time is reset to 0. "B" lights up.

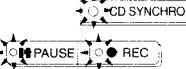

3 Program desired selections for side B.  
(See page 10, "Playing in a Desired Order — Program Play.")

4 Set the DIRECTION mode selector.

To record on one side, set it to  $\triangleleft$ .  
To record on both sides, set it to  $\triangleright$ .

5 Press CD SYNCHRO.

Deck B enters recording pause mode.

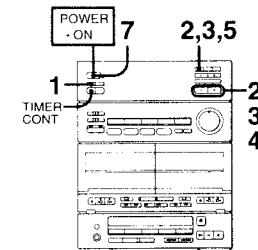

## Timer-Activated Operation

The power can be turned on and off automatically so that you can record a radio program while you are out, wake up to music, etc. The preset timer-on and -off time remain until you reset them or you disconnect the power cord. So, you do not have to set the timer every day to wake up to music. (However, the timer setting for recording a radio program is good for only once.)

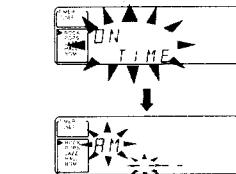

### Before setting the timer

- Make sure the clock is set correctly. (See page 7.)
- If you want to record a radio program, be sure to insert a tape long enough.

### Setting the Timer

1 Press TIMER SET.  
"ON TIME" appears and the hour digits flash in the display.

(to be continued)

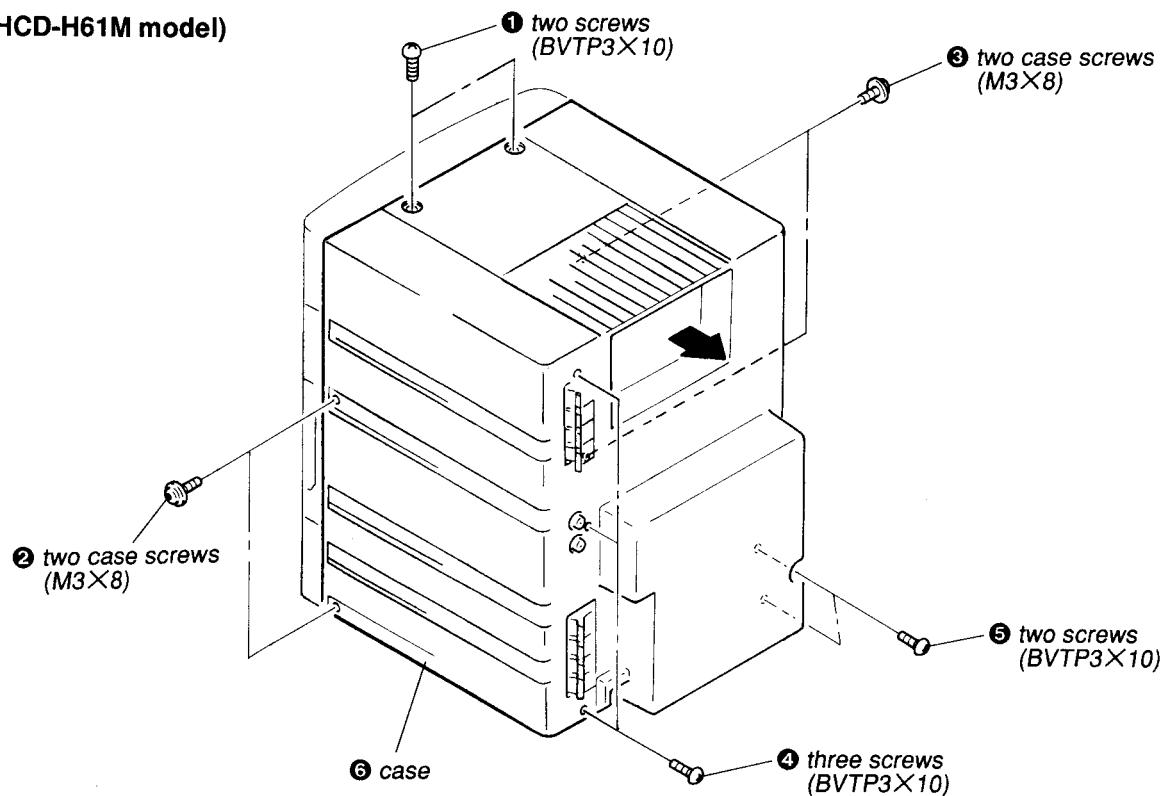

## SECTION 3 DISASSEMBLY

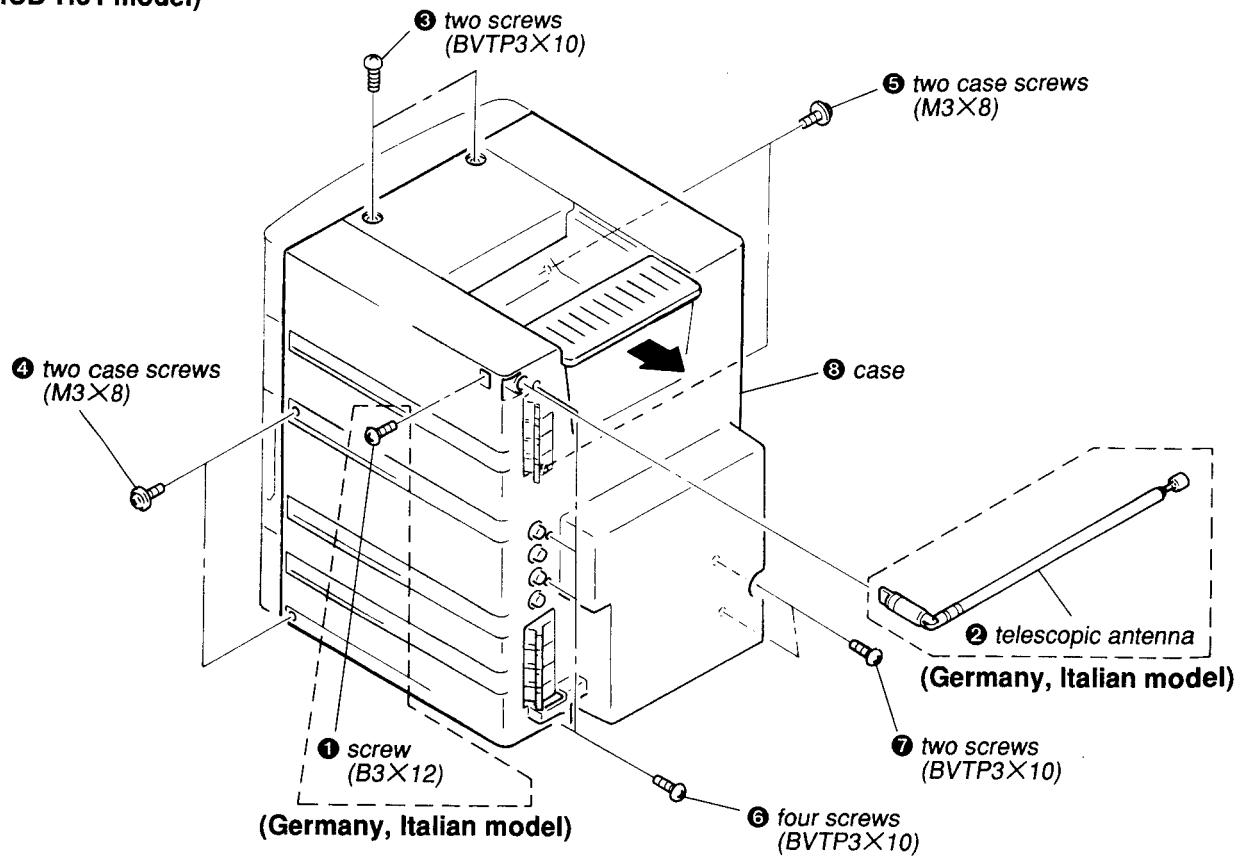

NOTE: Follow the disassembly procedure in the numerical order given.

### 3-1. CASE REMOVAL

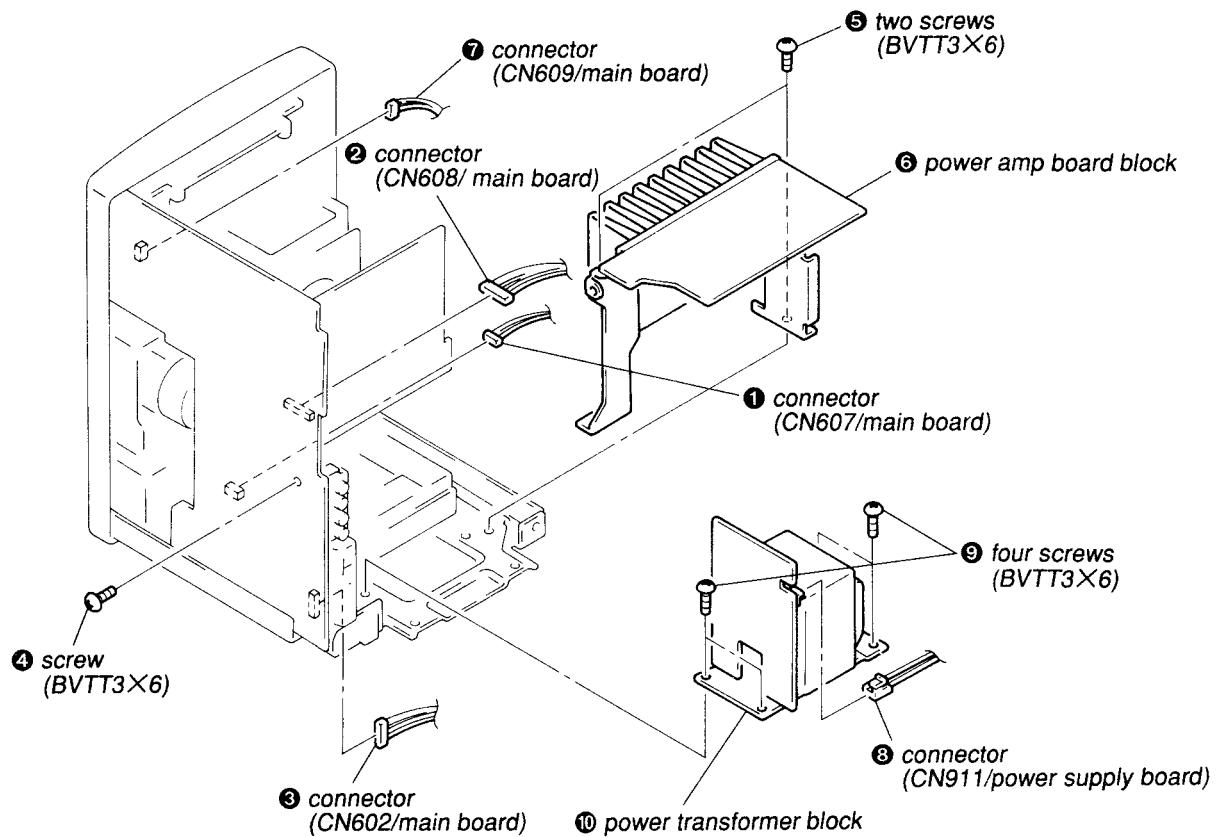

(HCD-H61M model)

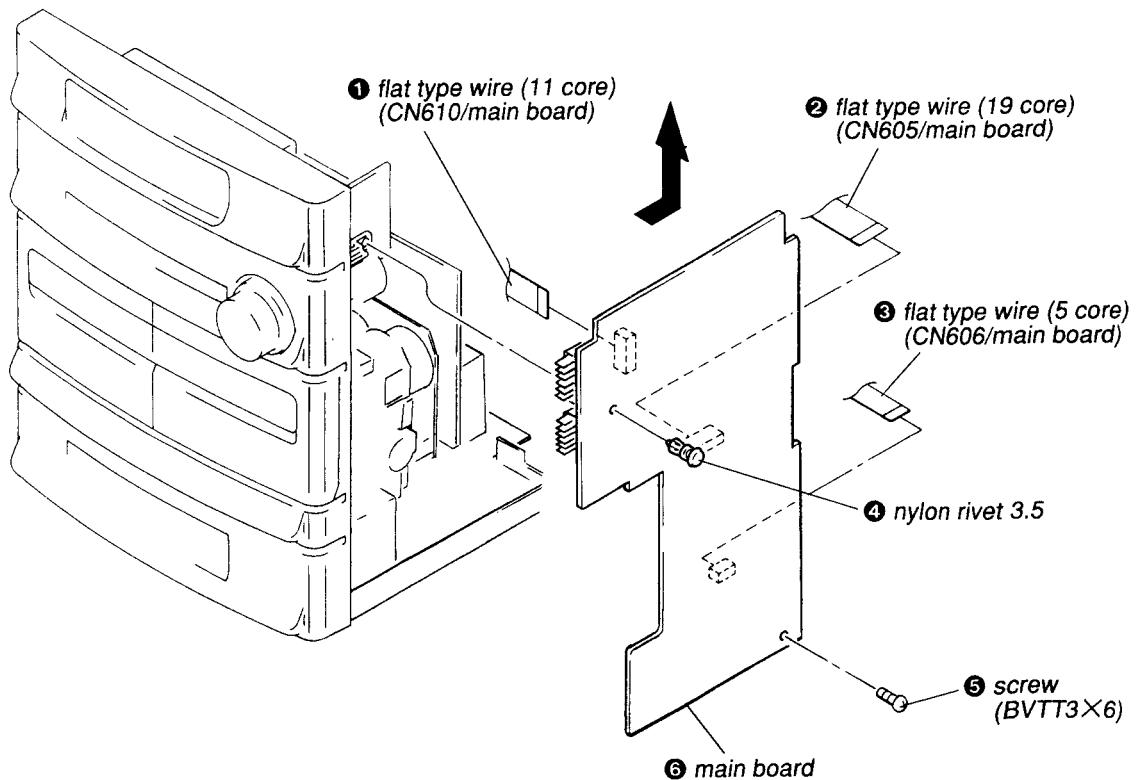

(HCD-H61 model)

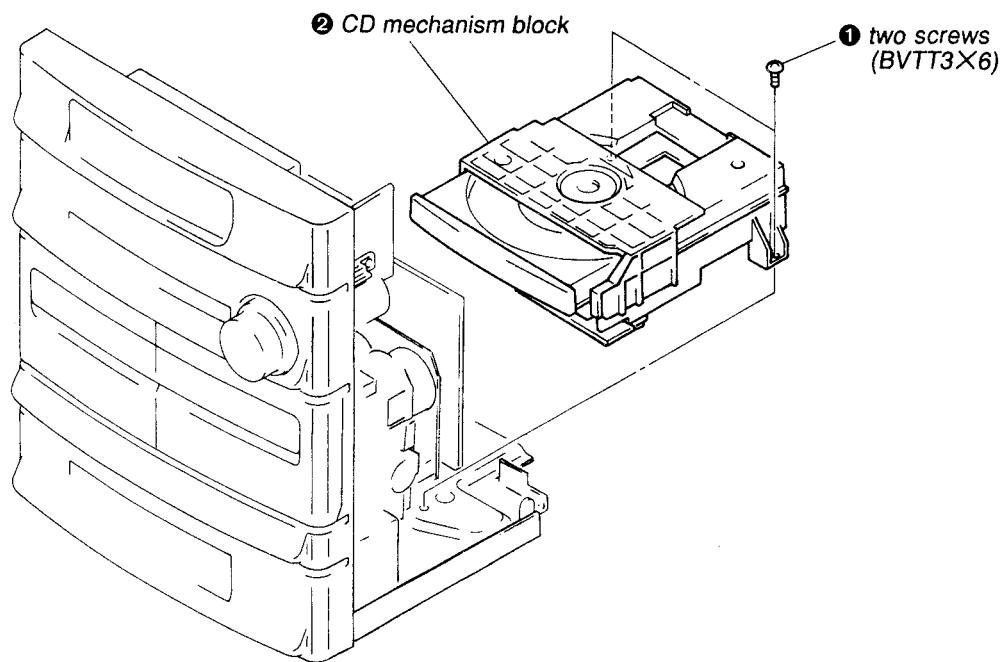

### 3-2. POWER BLOCK REMOVAL

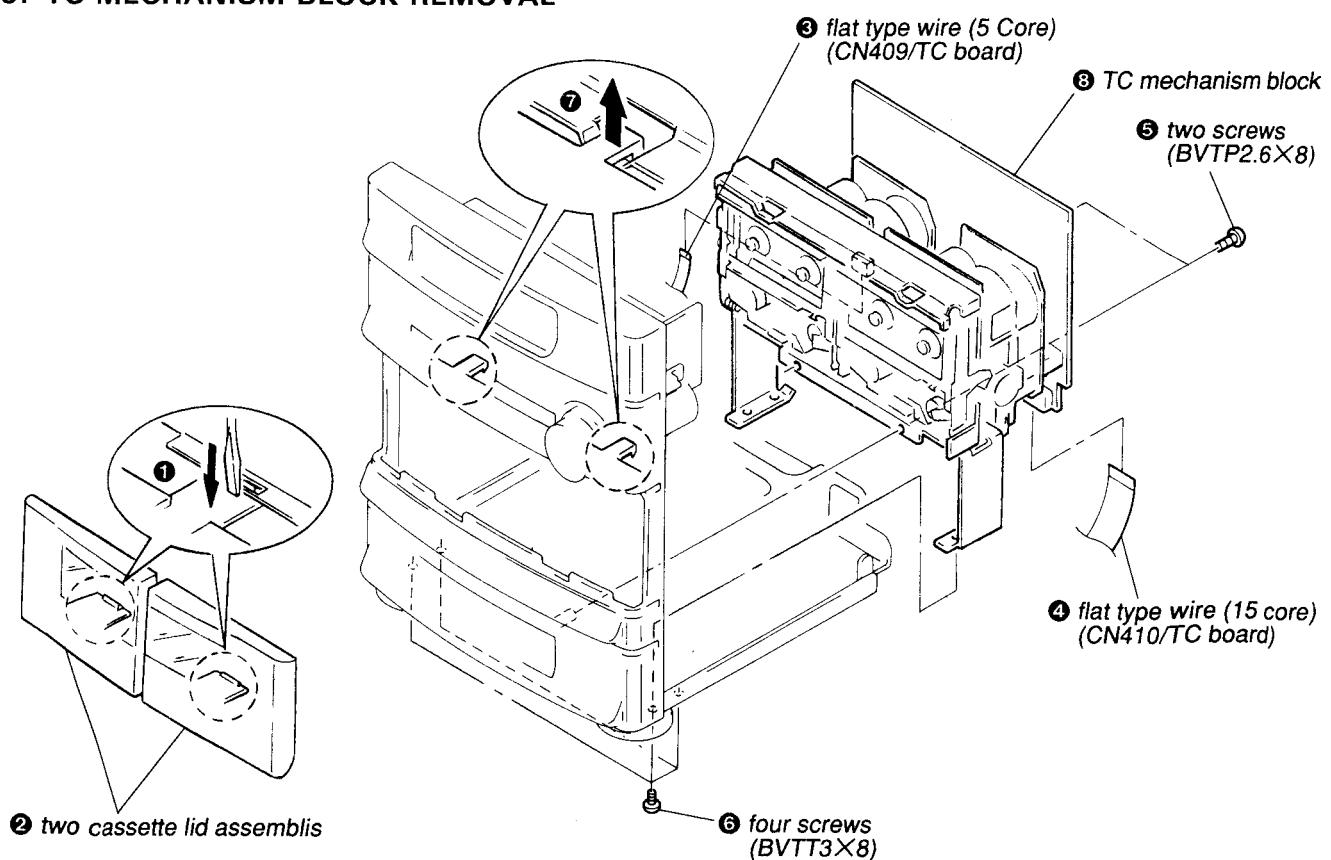

### 3-3. MAIN BOARD REMOVAL

### 3-4. CD MECHANISM BLOCK REMOVAL

### 3-5. TC MECHANISM BLOCK REMOVAL

## SECTION 4 MECHANICAL ADJUSTMENTS

### PRECAUTION

1. Clean the following parts with a denatured alcohol-moistened swab:
 

record/playback head	pinch roller
erase head	rubber belt
capstan	idler
2. Demagnetize the record/playback head with a head demagnetizer.
3. Do not use a magnetized screwdriver for the adjustment.
4. After the adjustments, apply suitable locking compound to the parts adjusted.
5. The adjustment should be performed with the rated power supply voltage unless otherwise noted.

#### • Torque Measurement

Torque	Torque meter	Meter reading
Forward	CQ-102C	35 to 60g · cm (0.49 to 0.83oz · inch)
Forward back tension	CQ-102C	2 to 6g · cm (0.028 to 0.08oz · inch)
Reverse	CQ-102RC	35 to 60g · cm (0.49 to 0.83oz · inch)
Reverse back tension	CQ-102RB	2 to 6g · cm (0.028 to 0.08oz · inch)
FF / REW	CQ-201B	70 to 110g · cm (0.98 to 1.52oz · inch)

## SECTION 5 ELECTRICAL ADJUSTMENTS

### DECK SECTION

1. The adjustment should be performed in the publication. (Be sure to make playback adjustment at first.)
2. The adjustment and measurement should be performed for both L-CH and R-CH.
  - Switch position  
DOLBY NR switch : OFF
3. Prior to electrical adjustments, short the connector CN401 (test mode).

#### • Test Tape

Tape	Contents	Use
P-4-A100	10kHz, -10dB	Head Azimuth Adjustment
P-4-L300	315Hz, 0dB	Level Adjustment
WS-48B	3kHz, 0dB	Tape Speed Adjustment

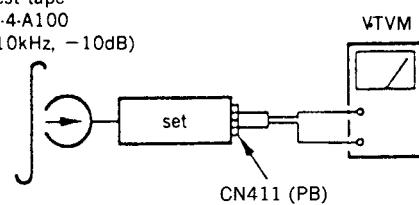

### Record/Playback Head Azimuth Adjustment

#### DECK A      DECK B

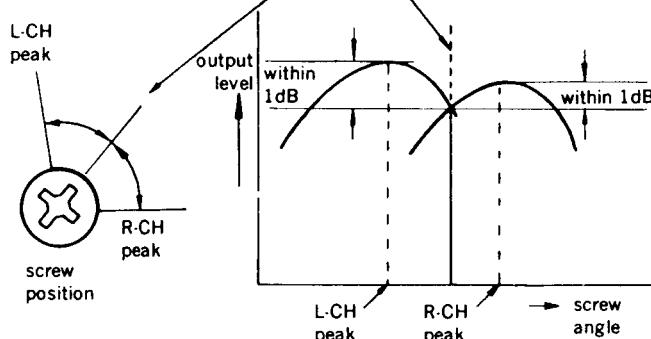

##### Procedure :

1. Forward Playback Mode  
Reverse Playback Mode

test tape  
P-4-A100  
(10kHz, -10dB)

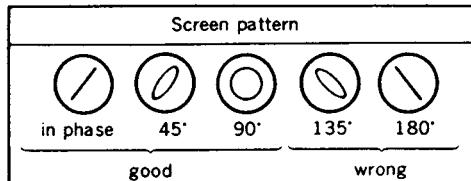

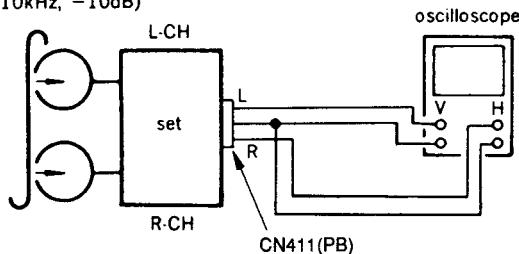

2. Turn the adjustment screw for the maximum output levels. If these levels do not match, turn the adjustment screw until both of output levels match together within 1dB.

3. Playback Mode

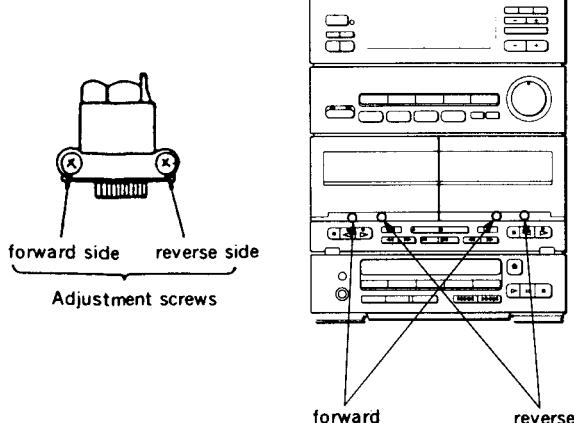

test tape  
P-4-A100  
(10kHz, -10dB)

4. Change the review playback mode and repeat the steps 1 to 3.  
5. After the adjustment, lock the adjustment screw with suitable locking compound.

**Adjustment Location :**

—record/playback head (deck A and B)

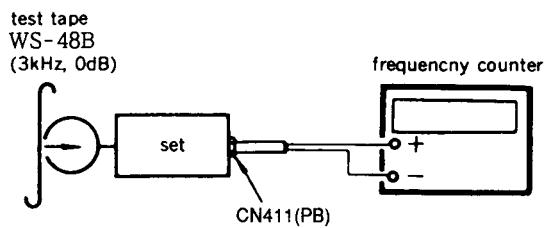

**Tape Speed Adjustment** **DECK A** **DECK B**

**Procedure :**

- Perform high speed adjustment before normal speed adjustment.

Mode : playback

Speed	Deck	Adjustment	Frequency counter
* High	A	RV72	5,970 to 6.030Hz
	B	RV72	
Normal	A	RV71	2,985 to 3,015Hz
	B	RV71	

\* Continue to press HIGH SPEED DUBBING switch (S557) in playback mode : High speed playback.

Frequency difference between the begining and the end of the tape should be within  $\pm 3\%$ .

Frequency difference between deck A and deck B the begining of the tape should be within 1.5%.

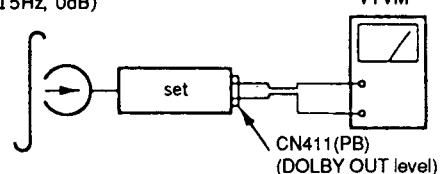

**Adjustment Location:** MD (AX) and MD (BX) boards.

**Playback Level Adjustment** **DECK A** **DECK B**

**Procedure :**

Mode : playback

test tape  
P-4-L300  
(315Hz, 0dB)

Deck A is RV11 (L-CH) and RV21 (R-CH), deck B is RV11 (L-CH) and RV21 (R-CH) so that adjustment within adjustment level as follows.

**Adjustment Level :**

LINE OUT level :  $-12.7 \pm 1.0\text{dB}$  (0.16 to 0.20V)

Level Difference between Channels : within 0.5dB

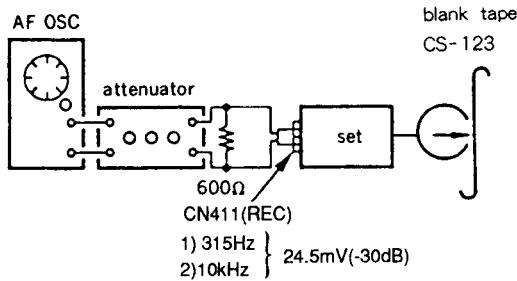

Confirm the DOLBY OUT level does not change in playback mode while changing the mode from playback to stop several times.

**Adjustment Location :** MD (AX) and MD (BX) boards

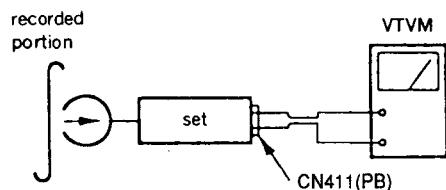

## Record Bias Adjustment DECK B

### Procedure :

1. record mode

2. playback mode

Confirm playback the signal recorded in step 1 become adjustment level as follows.

If these levels do not adjustment level, adjusment the RV12 (L-CH) and RV22 (R-CH) to repeat step 1 and 2.

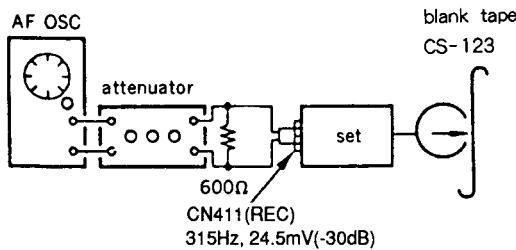

**Adjustment level :** Playback output of 315Hz to playback output of 10kHz :  $-0.5\text{dB}$  to  $0.5\text{dB}$ .

**Adjustment Location :** MD (BX) board

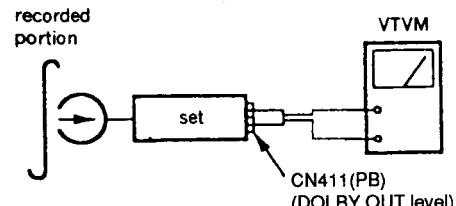

## Record Level Adjustment DECK B

### Procedure :

1. record mode

2. playback mode

Confirm playback the signal recorded in step become adjustment level as follows.

If these levels do not adjustment level, adjusment the RV103 (L-CH) and RV203 (R-CH) to repeat step 1 and 2.

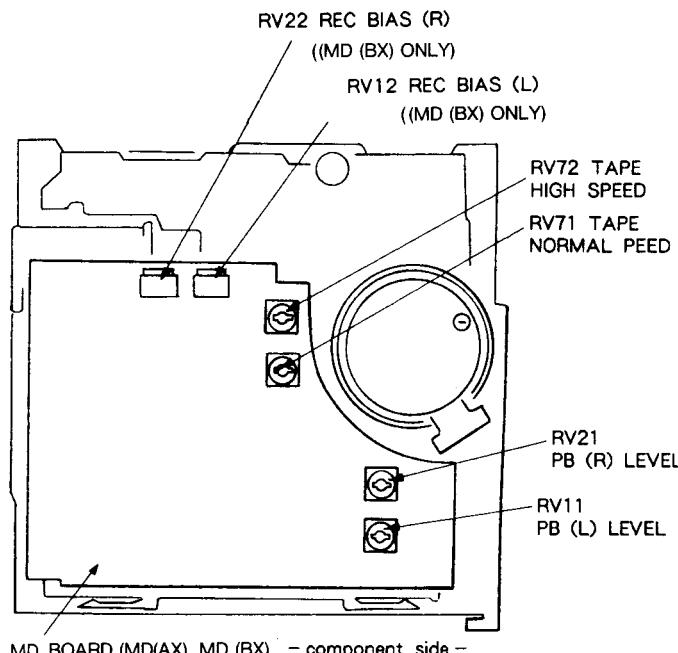

### Adjustment Level :

DOLBY OUT level :  $-39.0\text{dB} \pm 0.5\text{dB}$  (8.2 to 9.2mV)

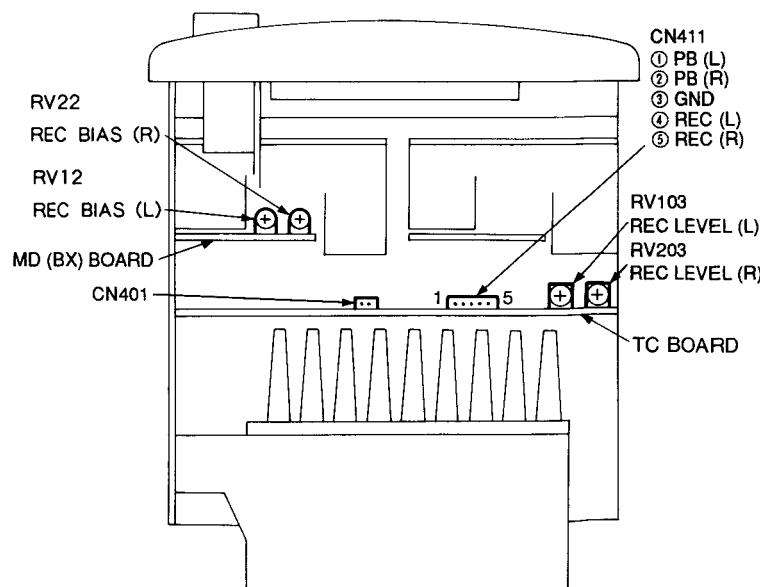

**Adjustment Location :** TC board

**Adjustment Location :**

Mechanism deck - rear side -

TC board - component side -

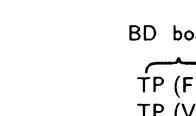

## CD SECTION

### Note :

1. CD Block base adjustment. The indicated.
2. Use YEDS-18 indicated.
3. Use the oscilloscope.
4. Clean an object with a detergent when value with the

### S-Curve Check

**Procedure :**

1. Connect oscilloscope to the main board.
2. Connect between the main board by lead wire.
3. Turned Power (actuate the front panel and out.)
4. Check the S-curve waveform. Symmetrical bell peak level with

S-curve waveform

5. After check, re-

**Note :**

- Try to make the ratio.
- Take sweep the bright

### RF Level Check

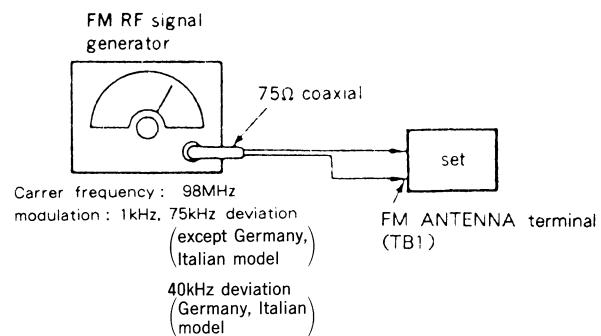

## TUNER SECTION

Note : As a front-end (FE1) is difficult to repair if faulty, replace it with new one.

## FM SECTION ADJUSTMENTS

### Setting :

## FM Tuned Indication Lighting Level Adjustment

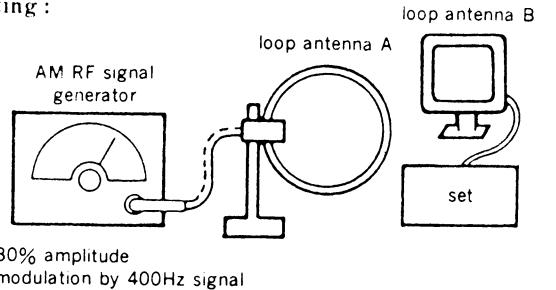

Band : FM

### Procedure:

1. Germany, Italian model:  
Supply a  $11\mu V$  ( $21dB\mu$ ) 98MHz signal from the ANTENNA terminal.  
except Germany, Italian model:  
Supply a  $13\mu V$  ( $23dB\mu$ ) 98MHz signal from the ANTENNA terminal.
2. Tune the set to 98MHz.
3. Adjust RV1 so that the [TUNED] light up.
4. Germany, Italian model:  
Confirm that the [TUNED] light off with FM RF signal generator output level set at  $18dB\mu$ .  
except Germany, Italian model:  
Confirm that the [TUNED] light off with FM RF signal generator output level set at  $20dB\mu$ .

## AM SECTION ADJUSTMENTS

### Setting :

## SW OSC Voltage Adjustment

Band : SW

### Procedure :

1. Connect the VOM to JW693 (OSC).
2. Tune the set to 5.95MHz.
3. Adjust T2 for 0.9 to 1.1V reading on the VOM.
4. Tune the set to 17.90MHz.
5. Adjust CT2 for 8.3 to 8.7V reading on the VOM.

## SW Tracking Adjustment

Band : SW

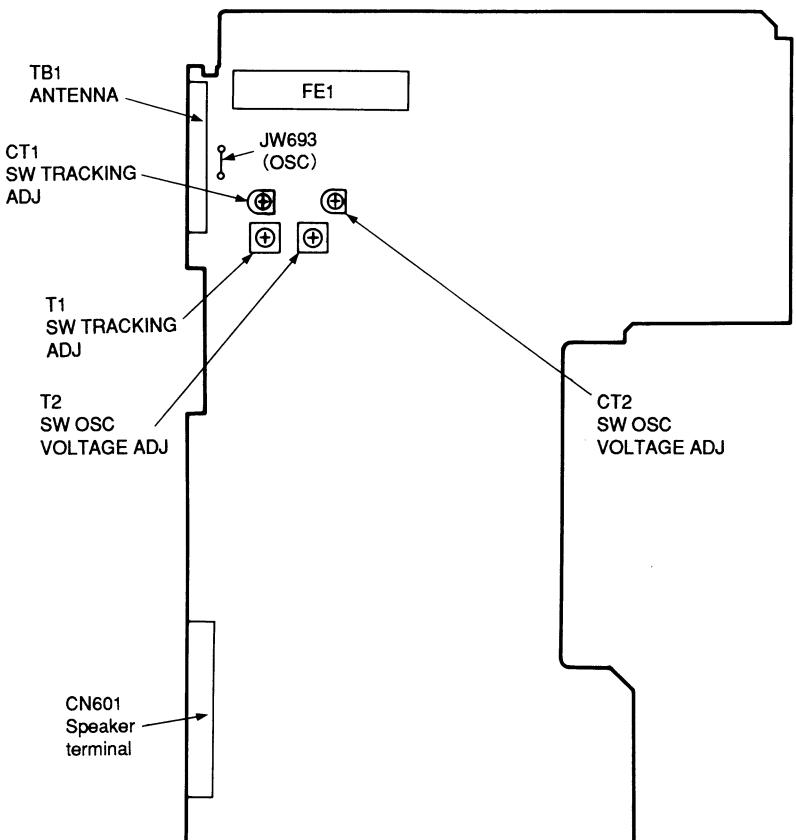

### Procedure :

1. Connect the VOM to speaker terminal.
2. Adjust for a maximum reading on VOM (CN601).

Signal generator and Set frequency	Adjustment part
7.0MHz	T1
17.0MHz	CT1

Adjustment Location : main board —component side—

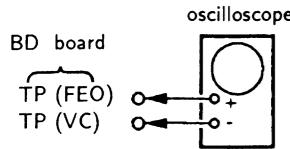

### [MAIN BOARD] (COMPONENT SIDE)

Block basically constructed to operate without adjustment. Therefore, check each item in order given. YEDS-18 disc (3-702-101-01) unless otherwise indicated.

the oscilloscope with more than  $10M\Omega$  impedance. Scan an object lens by an applicator with neutral detergent when the signal level is low than specified one with the following checks.

### e Check

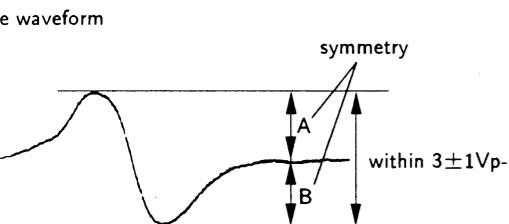

**Procedure :**  
1. Connect oscilloscope to test point TP (FEO) on BD board.

2. Connect between test point TP (FES) and TP (VC) with lead wire.

3. Turn Power switch on and actuate the focus search. (Check the focus search when disc table is moving in and out.)

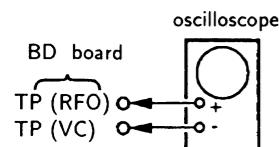

4. Check the oscilloscope waveform (S-curve) is symmetrical between A and B. And confirm peak to peak level within  $3\pm 1V_{p-p}$ .

After check, remove the lead wire connected in step 2.

- Try to measure several times to make sure that the ratio of A : B or B : A is more than 10 : 7.
- Take sweep time as long as possible and light up the brightness to obtain best waveform.

### level Check

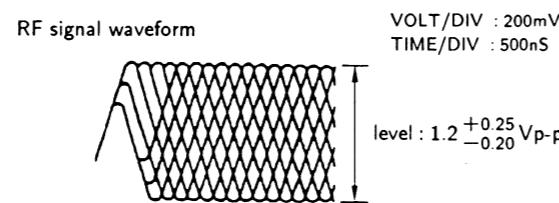

### Procedure :

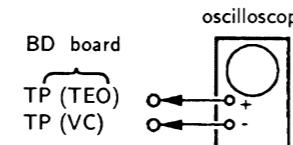

1. Connect oscilloscope to test point TP (RFO) on BD board.
2. Turn Power switch on.
3. Put disc (YEDS-18) in and playback.
4. Confirm that oscilloscope waveform is clear and check RF signal level is correct or not.

### Note :

Clear RF signal waveform means that the shape “◇” can be clearly distinguished at the center of the waveform.

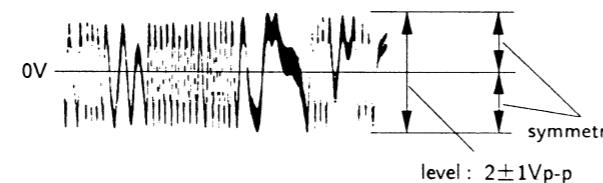

### E-F Balance Check

### Procedure :

1. Connect test point TP (ADJ) to ground and TP (TES) to TP (VC) with lead wire.
2. Connect oscilloscope to test point TP (TEO) on BD board.
3. Turn Power switch on.
4. Put disc (YEDS-18) in and playback.
5. Confirm that the oscilloscope waveform is symmetrical on the top and bottom in relation to 0V, and check this level.

### Traverse waveform

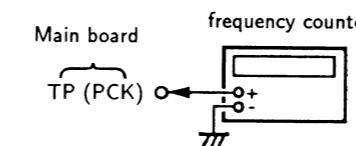

6. Remove the lead wire connected in step 1.

### RF PLL Free-run Frequency Check

#### Procedure :

1. Connect frequency counter to test point (PCK) with lead wire.

2. Turn Power switch on.
3. Confirm that reading on frequency counter is 4.3218 MHz.

### Focus/Tracking Gain

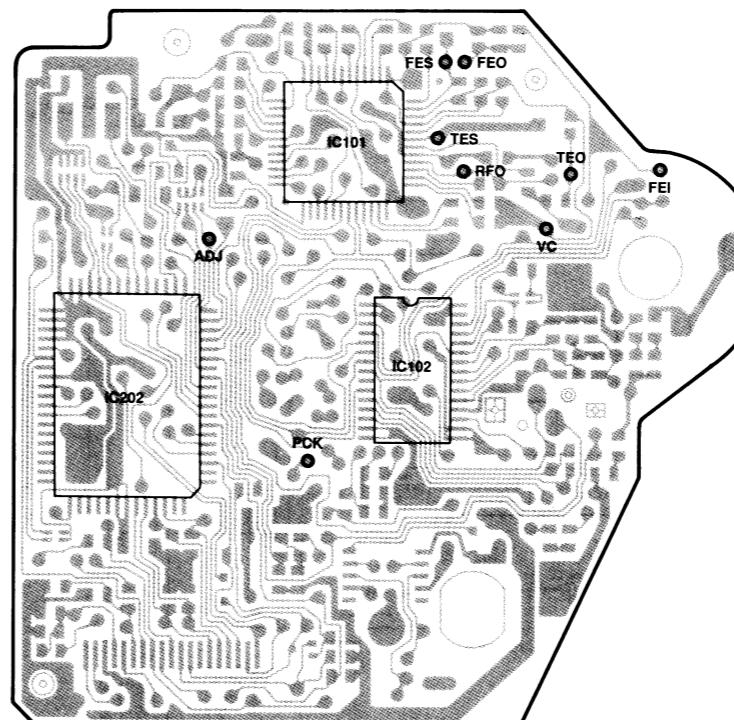

This gain has a margin, so even if it is slightly off. There is no problem.

Therefore, do not perform, this adjustment.

Please note that it should be fixed to mechanical center position when you moved and do not know original position.

### Adjustment Location :

## **SECTION 8**

### **ELECTRICAL PARTS LIST**

BD

NOTE:

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- -XX and -X mean standardized parts, so they may have some difference from the original one.
- **RESISTORS**  
All resistors are in ohms.  
**METAL:** Metal-film resistor.  
**METAL OXIDE:** Metal oxide-film resistor.  
**F:** nonflammable

- Items marked "+" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- SEMICONDUCTORS  
In each case,  $\mu$ : $\mu$ , for example:  
 $\mu$ A :  $\mu$ A.     $\mu$ PA :  $\mu$ PA.  
 $\mu$ PB :  $\mu$ PB.     $\mu$ PC :  $\mu$ PC.     $\mu$ PD :  $\mu$ PD..
- CAPACITORS  
 $\mu$ F:  $\mu$ F
- COILS  
 $\mu$ H:  $\mu$ H

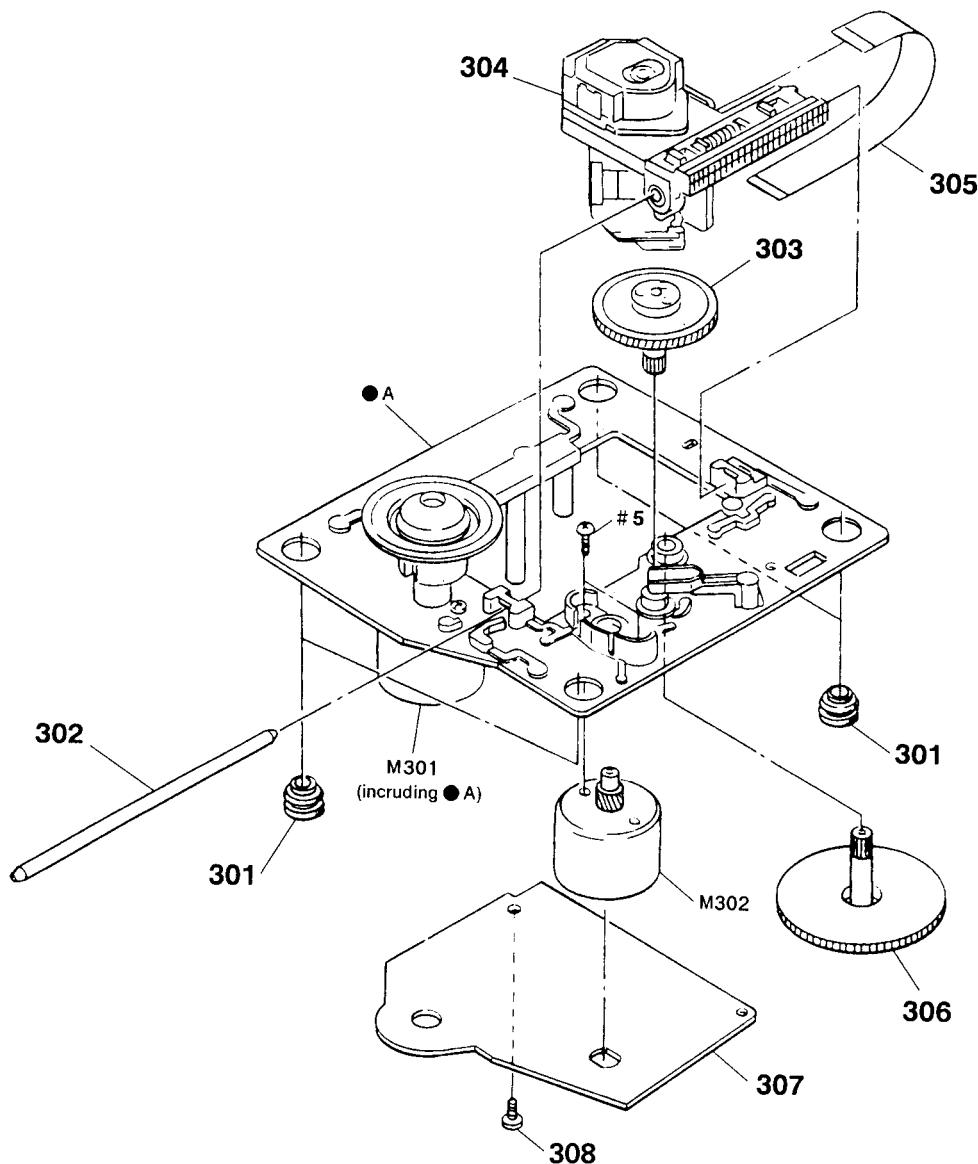

When indicating parts by reference number, please include the board

The components identified by mark **▲** or dotted line with mark **▲** are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque  $\Delta$  sont critiques pour la sécurité.  
Ne les remplacer que par une pièce portant le numéro spécifié.

## SERVICE MANUAL

*AEP Model*

### SPECIFICATIONS

Speaker system	3 - way system
Speaker units	Woofer : 13 cm dia., cone type Tweeter : 5 cm dia., cone type Super tweeter: 2 cm dia., dome type
Enclosure	Bass reflex
Frequency range	65 Hz – 20 kHz
Sensitivity	88 dB/W/m
Rated impedance	6 ohms
Dimensions	Approx. 175 x 285 x 235 mm (7 x 11 <sup>1</sup> / <sub>4</sub> x 9 <sup>3</sup> / <sub>8</sub> inches)
Mass	Approx. 2.9 kg (6 lb 6 oz) net per speaker

Design and specifications subject to change without notice.

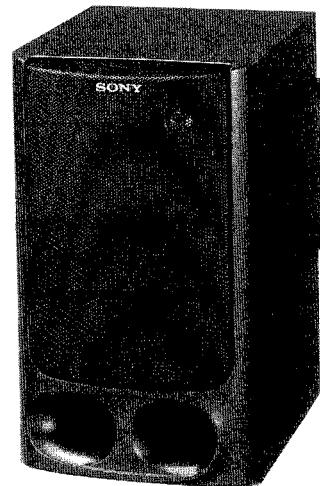

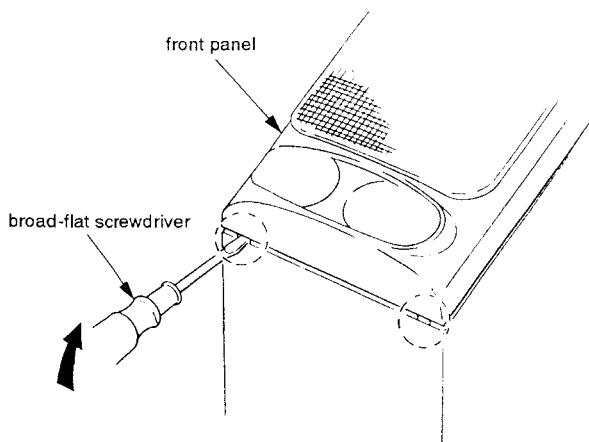

Photo: L-CH

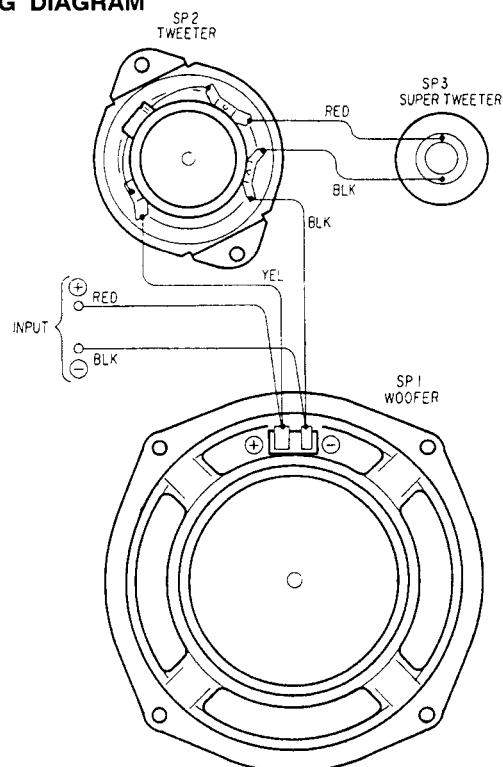

This set is the speaker system in FH-B510, and FH-B610.

### 1. FRONT PANEL REMOVAL

Note: Be careful not to scratch the cabinet.

### 2. WIRING DIAGRAM

**SONY**®

### 3. EXPLODED VIEW AND PARTS LIST

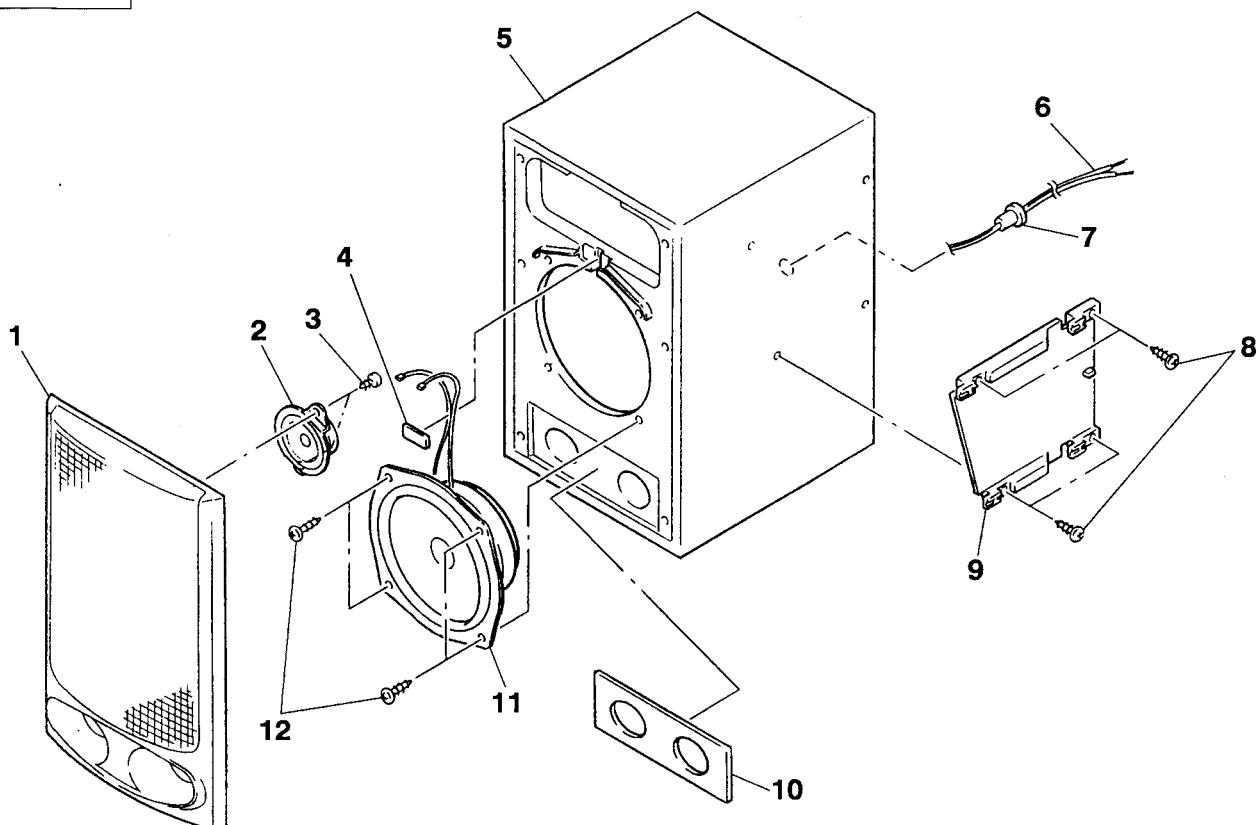

#### NOTE:

- -XX, -X mean standardized parts, so they may have some difference from the original one.

- Items marked “\*” are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.

- The mechanical parts with no reference number in the exploded views are not supplied.
